SBCC Institution-Set Standards 2021-22

SBCC Institution-Set Standards are the minimum threshold for each measure, below which we seek causes and remedies.
The ACCJC requires each institution to declare, monitor, and discuss these standards, and to include them in the institution's Annual Report to the ACCJC.

Note. The threshold is set as one standard deviation below the 5-year average for each standard. Math and English throughput is based on semesters following AB705 implmentation, i.e., fall 2019. Successful course completion is based on an 8-year average. High school capture rate is based on the four most recent fall cohorts for which we have data, Fall 2018 - Fall 2021.
